Virtual games – a real help

The charity organization "Partnership for every child," supported by the developer of children's educational applications FounDreams, is proud to announce the launch of the charity action "Give childhood" September 3 to 23, 2012.

Everyone who downloads any children's educational application developed by FounDreams on his/her iOS (iPad, iPhone, or iPod Touch) or Android device is **automatically donating $1 from the application cost to the "Respite" program.**

This is a program for short-term placement of children with special needs to specially trained host families. This is a life saver for parents of children with disabilities as such children from large families are often placed into boarding schools. This program is especially helpful for single moms who are responsible for caring and providing treatment for more than one child.

The action takes place all over the world, and parents who have both iOS and Android devices are welcome to take part in it. Their kids are getting high-quality educational games, and kids in need of help – chance to grow up with their own families!

The story of one family can be found here.
Additional information about the "Respite" program can be found here.

The results of the action will be published on the website of the charity organization "Partnership for every child" and on the FounDreams website on October 1, 2012.

Thank you for caring!
